PROFESSIONAL SUMMARY

Frontend developer with 2+ years building real-world web applications with **React**, **Next.js** and **TypeScript**, including products in production for real businesses, several of them built by me end to end. Focused on reusable, accessible component libraries (Radix UI, shadcn/ui), REST API integration, animation (Framer Motion, GSAP) and performance/SEO optimization with SSR/SSG. University background in Computer Science (1st year) and a Pharmacy degree, bringing analytical rigor and systematic problem-solving. Seeking my first formal position on a product team where I can grow fast and contribute from day one.

REAL-WORLD PROJECT EXPERIENCE

Frontend Developer — Collaborative and personal projects (remote) | Jan 2024 – Present

- Built almost entirely **Yacht Miami Experience** (yachtmiamiexperience.com), a yacht charter platform **in production for a real business**: multi-language catalog (EN/ES), admin panel and booking flow with **Stripe** payments, built with Next.js, TypeScript, Tailwind CSS, **Supabase** (authentication and storage) and Prisma on **PostgreSQL** — frontend and backend implemented by me, with review from a senior developer.
- Implemented the UI of a commercial multi-tenant SaaS platform with 3 applications (dashboard, admin and landing) in a **Turborepo** monorepo with Next.js, React and TypeScript, including dynamic theming and internationalization with next-intl, teamed with a senior developer.
- Built entirely by myself an events platform for a real business (Uruguay), implementing **authentication and storage with Appwrite**, media on **AWS S3** and interactive animations, deployed to production on Vercel.
- Built **reusable, accessible component libraries** with Radix UI and shadcn/ui (dark/light theming, WAI-ARIA).
- Integrated **REST APIs** with SWR for data fetching and caching, Axios and native fetch; complex forms with **React Hook Form**.
- Implemented advanced animations with **GSAP** (timelines, ScrollTrigger) and **Framer Motion**, smooth on mobile.
- Applied **SSR/SSG and Server Components** (App Router) to improve performance, SEO and **Core Web Vitals**; continuous deployment on Vercel with Git/GitHub.

FEATURED PROJECTS

Yacht Miami Experience — Next.js · TypeScript · Tailwind · Supabase · Stripe · Prisma · Framer Motion · i18n

Production website for a real yacht charter business in Miami. **My role**: built almost the entire product — UI, animations, backend (Supabase, Prisma) and Stripe payments.

VOO Platform — Next.js · React · TypeScript · Tailwind · Radix UI · next-intl · SWR · Turborepo

Multi-tenant SaaS (3 apps) with a template system and multi-language support. **My role**: UI and component development, teamed with a senior developer.

CubanParty — Next.js 15 · React 19 · Tailwind · Framer Motion · Appwrite · AWS S3

Events platform for a real business (Uruguay), **built entirely by me**: authentication, media storage and animations. In production.

Dev Events — Next.js (App Router, Server Components) · TypeScript · MongoDB/Mongoose · Tailwind · shadcn/ui

Personal project: an events platform for developers using the latest Next.js features with MongoDB persistence. [Code on GitHub](#).

Mojitos Bar — React · TypeScript · Vite · Tailwind · GSAP — Personal project focused on advanced animation (timelines, ScrollTrigger) and micro-interactions. Deployed on Vercel. [Code on GitHub](#).

TECHNICAL SKILLS

Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, React 18/19, Next.js 14–15 (App Router, SSR/SSG, Server Components), Tailwind CSS, Radix UI, shadcn/ui, Framer Motion, GSAP, SWR, React Hook Form, Axios/fetch, Responsive Design, Git, GitHub, Vercel, Figma

Hands-on experience: Supabase (Auth, Storage), Appwrite, Stripe (payment flows), AWS S3, Prisma ORM, PostgreSQL, Node.js, Express, MongoDB/Mongoose, next-intl (i18n), web accessibility, technical SEO, Core Web Vitals, Turborepo

Familiar with: Vitest, React Testing Library, Zustand, Redux, Docker, CI/CD, Agile/Scrum

EDUCATION

Full Stack Open — University of Helsinki (online) · React, Node.js, Express, MongoDB, testing with Vitest — in progress

Computer Science — **1st year completed** — University of Havana · 2022–2023 · Algorithms, data structures, discrete mathematics, programming (C#.NET)

BSc in Pharmaceutical Sciences — University of Havana · 2017–2021

Ongoing self-directed frontend training — 2022–Present · Official documentation, production projects and technical communities

Languages: Spanish (native) · English (professional, B2) · **Work mode**: remote, hybrid or on-site in Madrid
